

Harris Split-Level Combining (Patents Pending)

Benefits over standard High Level Combining include:

- Up to 25% reduction in current FM transmitter TPO
- This may eliminate need to purchase or upgrade new FM TX
- Up to 85% reduction in reject load power (reduced bldg heat)
- Up to 7% improvement in overall efficiency (\$\$\$)
- Provides built-in low power back-up FM TX (space saving)
